

Night Vision Rental FAQs

How much does night vision cost to rent?

The standard cost is \$75 per tube (PVS-14) for the event.

The cost for dual tubes is \$150 (PVS-15) for the event.

The cost for a rental helmet is \$25 if you do not have a sufficient way to mount the NVG unit.

What does the rental include?

A PVS-14 or PVS-15 plus the J Arm and Wilcox style mount if needed. You can also rent a bump style helmet if you do not have a reliable means of mounting the unit.

What type of night vision do you have available?

All of our rental tubes are Gen 3 white phosphor or a Gen 3 Green Phosphor. We offer Elbit tubes for rentals.

How does the rental process work?

You will have to sign a rental agreement. If you are a minor you will have to have your parent do this. We will have the rental agreements available on-site. For payment of the rental equipment, we will either take cash on-site or online payment methods on our website. We will hold onto your valid driver's license and a major credit card until you return the rental unit(s) to us at the conclusion of the event.

Why do you have to hold onto my ID and credit card?

Due to the ITAR compliance (International Traffic in Arms Regulations) and ensure that you take responsibility for care of the unit while you have it in your possession.

Am I responsible if the unit is damaged, lost or stolen during the rental period?

Bottom Line is; yes. This is one reason why we have a rental agreement so both parties understand who is responsible for what.

When will I receive the rental equipment?

We typically begin check-in on Friday afternoon with game play on Saturday. We will allow you to pick it up Friday evening after check-in so we can cover how to mount and operate the rental unit properly.

When can I turn in my rental unit?

We will designate a time Saturday night or Sunday morning to turn the unit(s) in when you check them out.
